

Overview

Dentons ACAS-Law advises on deal structuring required for each specialised transaction and to this end has prepared, reviewed and analysed due diligence reports and where necessary, set-up data rooms. In particular, the firm has continuously had to review the typical Nigerian law issues.

These issues include such matters as:

- loan investment importation and remittance;
- the costs attendant to and mitigation of stamp duty;
- withholding tax on foreign loans and ways to mitigate the liability;
- interest payments;
- assignability/novation of any licences, insurances, permits, contracts;
- review of securitization under Nigerian law and other mandatory provisions of Nigerian law.
